

# EN Update procedure TM1010 (shown on the back of your DayClock)

(sub-instructions are not always shown)

1. Make sure your Account and WiFi are active on the DayClock and press "Test".
2. Now from this "DayClock settings menu" swipe the screen 2x down until a "gear" appears on the top menu line and select it.
3. Find and select "Apps".
4. Find and select our "Clock"
5. Find and select "Home app"
6. Find and select "Home app" again
7. Find and select "Launcher3".
8. Press the triangle ◀ on the bottom menu line.
9. Find and select "Security".
10. Find and select "Unknown sources".
11. Press "OK" (bubble moves to the right).
12. Press the circle ⊙ on the bottom menu line.
13. Find and select the "Browser" tab.
14. Type the web address on the top menu line "<https://bit.ly/2zdkEFB>".
15. Select "enter" (right arrow).
16. Select "tc-calendar-10-update.apk".
17. Select "INSTALL".
18. Select "DONE".
19. Swipe the screen down 2x again and select the gear.
20. Select "Security" again.
21. Now turn off "Unknown sources"! (bubble goes to the left).
22. Select the triangle on the bottom menu bar.
23. Find and select "Apps".
24. Find and select "Clock".
25. Find and select "Home app".
26. Find and select "Home app" again.
27. Select "Clock".
28. Select the circle ⊙ on the bottom menu bar.
29. You now have the latest software version.
