

## Update procedure for DayClock 10

This update procedure is for a DayClock 10 with this logo on the back.

Note: Sometimes you have to swipe the screen up or down to find an option.

1. Use the three finger option to select the DayClock "Settings" menu.
2. Press "Test". Username and password must be valid.
3. From this DayClock menu, swipe the screen down and select the "gear" next to the pencil.
4. Select "Apps & Notifications".
5. Select "Advanced".
6. Select "Default apps".
7. Select "Home app".
8. Select "Launcher3".
9. Select the circle  $\odot$  on the bottom menu line.
10. Select the "Google"
11. Select "no thanks" and enter the following URL
12. Type "<https://bit.ly/dayclockduo>" and select the right arrow (Enter).
13. Wait for the download to complete.
14. Then type "<https://bit.ly/upgrade102>" and select the right arrow (Enter).
15. Wait for the download to complete.
16. Swipe the screen down from the top left and select: "duo.apk"
17. Select "settings" and "Allow from this source" and go back with the triangle  $\triangleleft$  at the bottom.
18. Select "Install" and "Done".
19. Swipe the screen down from the top left and "tc-agenda-10-1280-update.apk"
20. Select "Install" and "Done".
21. Now swipe the screen down and select the "gear" again.
22. Select "Apps & Notifications".
23. Select "Advanced".
24. Select "Default apps".
25. Select "Home app".
26. Select "Clock".
27. Press the circle  $\odot$  on the bottom menu line.
28. Restart the DayClock.
29. You now have the latest update.

30. Eventually you have to log out and log in again from the DayClock app to synchronize it with the DayClock.
